

Farman Ali

+92 3058960516, Nationality: Pakistani, DOB: 20-06-2003, Gender: Male
Languages: English (Working Proficiency), Urdu (Fluent), Sindhi (Native)
<https://www.linkedin.com/in/farman-ali-bb7081265> farmanalishaikh29@gmail.com
Location: House no: A-222, Sindh Merhan Society, Phase-1 Jamshoro, Sindh, Pakistan

PERSONAL PROFILE

- To leverage my in-depth knowledge of cyber security principles and practices to protect organizations from evolving cyber threats, demonstrating expertise in threat detection and mitigation.
- To pursue continuous professional development in the field of cyber security, staying up-to-date with the latest technologies and methodologies to ensure the highest level of security for the organization.
- To excel in incident response management, effectively leading and coordinating cyber security incident investigations, and implementing robust strategies to prevent future security breaches.

EDUCATION

Undergraduate - Final Year Bachelor of Science in Cyber Security Mehran University of Engineering & Technology	DEC 2022 to Present Jamshoro, Pakistan 7 Semesters CGPA: 3.59 Anticipated Graduation: November, 2026
---	--

PRACTICAL CYBER DEFENSE EXPERIENCE

- Conducted vulnerability assessments and basic penetration testing using tools like Nmap, Nikto, SQLMap, and reconnaissance frameworks during labs and projects.
- Performed security monitoring and alert analysis using SIEM tools (Splunk, ELK, Wazuh), identifying brute-force attacks, phishing attempts, and malware activity.
- Gained hands-on experience in incident response, including detection, analysis, containment, and reporting of security incidents.
- Worked with network security controls such as firewalls (pfSense), ACLs, VLAN segmentation, and NAT for secure network design.
- Integrated and configured security tools (Wazuh, VirusTotal, Squid proxy) for threat detection, log monitoring, and domain/IP blocking.
- Performed network traffic analysis using packet analysis tools (e.g., Wireshark/Scapy) to detect suspicious communication patterns.
- Gained foundational exposure to risk assessment concepts, identifying threats, vulnerabilities, and suggesting mitigation strategies.
- Familiar with compliance frameworks concepts such as ISO 27001, SOC 2, and security governance through coursework and certifications.
- Developed and tested automated security scripts (Bash/Python) for reconnaissance and information gathering.
- Maintained awareness of emerging cyber threats and attack techniques through continuous learning and hands-on labs.
- Assisted in SOC-level security operations workflows, including alert triage, escalation, and documentation.

INTERNSHIP

Remote
Security Operation Center Intern
ITSOLERA Pvt Ltd Islamabad

JUNE 2024 -
SEPTEMBER 2024

KEY TASKS

- Integration of Wazuh with pfSense.
- Blocking Unauthorized IPs.
- VirusTotal and Squid Integration.
- Domain Blocking and log Monitoring.

RESEARCH INTERESTS

- Network Security
- Digital Forensics and Privacy Preservation
- Cyber Threat Detection and Malware Analysis
- Risk assessment, security policies, compliance frameworks, and regulatory alignment.

PROJECTS

- **Employee Management System**
Developed a Java GUI based application using Swing library and SQL to manage employee records. Features include adding, editing, and retrieving employee data through a sleek, user-friendly interface.
- **Network Design**
Designed a secure, scalable campus network using VLANs, RIPv2, and DHCP in Cisco Packet Tracer, ensuring optimized traffic flow, dynamic IP allocation, and VLAN-based isolation for performance and security.
- **Multi-Browser History Extraction & Forensics Tool**
Developed a GUI-based Python application that safely extracts and parses browsing artifacts from multiple mainstream browsers (Chrome, Edge, Brave, Firefox) without interrupting live databases. Integrated real-time query filtering, detailed activity timeline visualizations via Matplotlib, and structured CSV/JSON reporting for forensic investigations.
- **Auto Email Sender**
Built a Python-based auto email sender with a Tkinter GUI, allowing users to send customized emails directly through SMTP. Utilized libraries such as smtplib, email.message, and tkinter to create a functional, user-friendly automation tool.
- **Redundant and Secure Multi-VLAN Campus Network Implementation**
Designed and implemented a secure, redundant, and scalable multi-VLAN campus network architecture. Integrated Smart Link, Monitor Link, GVRP, Inter-VLAN routing, ACLs, and NAT to ensure optimized traffic flow, high availability, and strong access control.
- **Network Packet Analyzer**
Built a simple packet analyzer using Python and libraries such as scapy/socket, allowing real-time packet capture and protocol inspection. Focused on understanding packet structure, headers, and network traffic flow.
- **Virtualized Network Security & pfSense Firewall Implementation**
Designed and deployed a software-based firewall architecture using pfSense and Ubuntu within a VMware environment. Configured advanced security policies, including domain filtering, administrative privilege access control, and GeoIP blocking via pfBlockerNG to restrict high-risk country traffic.
- **DFIR Email Analysis Tool**
Developed an open-source Streamlit-based web application to automate the parsing, header verification (SPF/DKIM/DMARC), and threat scoring of .eml files. Implemented URL intelligence and attachment analysis to extract Indicators of Compromise and detect phishing anomalies.
- **A SIEM-Integrated Security Monitoring Framework for Automated Threat Detection in 5G O-RAN Networks**
Designed a SIEM-compatible rule engine supports early and accurate detection of DoS/DDoS and network flooding attacks in O-RAN environments.

CO CURRICULAR ACTIVITIES

- Collaborated with peers on group cybersecurity labs and Capture-the-Flag (CTF) challenges in Hackathons.
- Conducting cybersecurity awareness seminars as Guest of Speaker
- Worked with educational NGO's to promote education and nurture talent.
- Serving as a Campus Ambassador for ITSOLERA Pvt Ltd Islamabad and TechHunters Valley, promoting technology initiatives, cybersecurity awareness, and student–industry engagement.

CERTIFICATION

- “Certified Google Cybersecurity” from GOOGLE.
- “CISCO Certified Network Associate” from CISCO.
- “HCIA-DATACOM” from Huawei
- “Digital Forensics Essentials” from EC-Council.
- “ISO/IEC 27001:2022 Information Security Associate” from SKILLFRONT
- “ISO/IEC 20000 IT Service Management Associate” from SKILLFRONT
- “Certified Ethical Hacker” from Professional Freelancing Training Program
- “Certified Phishing Prevention Specialist” from Hack&Fix
- “Certified Artificial Intelligence Security & Risk” from RedTeamLeaders
- “Certified Cybersecurity Educator Professional from RedTeamLeaders

REWARDS

- Awarded a badge for organize a workshop on “Artificial Intelligence and Machine Learning” at Mehran University of Engineering and Technology Jamshoro.
- Awarded a medal for securing a top position in the “Certified Ethical Hacker” Course from Professional Freelancing Training Program.
